Meetings

→ March 3rd 2024 (Online)

◆ Meeting to complete previous deliverable

→ March 9th 2024 (In person)

◆ Meeting to discuss what needs to be done for the last deliverable

→ March 12th 2024 (In person)

◆ Final deliverable check-in meeting

Recent Progress

Since the last progress report, we regrouped as a team and organized the remainder of the tasks that would be left to do as the project comes to an end. This includes:

- Design Day planning and preparation
- Grooming of remaining backlog tasks
- Design discussions about implementation of certain features
- Research and planning about E2GRulewriter algorithms

We also have begun implementing user stories assigned to the final sprint. We have worked on identifying conflicting rules, as well as eliminating redundant conditions and actions.

Additionally, we spent time documenting our decision table editor application's functionality, as well as commenting and cleaning up our source code.

Future Plans

Our future plans for this final period of time are clear and identified. The progress report is due on the 22nd of March, however, our final sprint (sprint 8) is completed on the 27th of March. Therefore, the coming 5 days will be focused on ensuring the implementation of these user stories was successful and working. On the 28th of March, we will begin our final phase, where our team will begin working on the poster presentation which will be presented on the 3rd of April. Quickly after that, we would begin to complete our final project report which is due on the 12th of April. One key date to note is April 9th which will be the date we handoff our final working product to our project supervisor and we would have done an extensive testing session to ensure the product is as intended. In addition, we would ensure all documentation is up to date such that any team that would like to take over and continue our project, can do so whilst minimizing all the hassle. Completing these remaining tasks will mark the end of our project and coincides with the last day of class (April 12).
